IT Infrastructure Administrator | Colorado Access

Cover letter

Hi Colorado Access team,

I've called myself a technomancer since I was a kid, when technology first felt like magic to me. The moment I enjoy most now is a little less glamorous: a service comes back, someone can get to work again, and we can explain what changed and know how to recover next time.

At Technomancy IT I've supported Windows Server and Active Directory, worked with Azure and Microsoft 365 in client environments, and handled the changes and support that follow a rollout. At Front Range Internet I ran NOC operations and worked across physical infrastructure, VMware and Hyper-V. I've also built checks that test whether data can actually be restored, not just whether a backup job reported success.

The mix of cloud, on-premises systems and practical operations is what interests me here. I'd like to help the Colorado Access team make platform changes easier to verify and troubleshoot, so the people supporting members have reliable tools to work with.

Thanks,
Chad Koslovsky
